VISTA GARDENS MEMORY CARE

Located in Vista, CA, Vista Gardens Memory Care offers senior care services personalized for each of their community members to enhance their quality of life and provide their family with peace of mind.

The Project Challenge (Pain Point)

- + High Energy Costs
- + 24/7 senior memory care services resulted in high electricity for Vista Gardens
- + Leadership at the facility anticipated electricity costs to increase in the future
- + The organization needed a low-cost energy solution to mitigate high energy expenses.

Project Specs

Location :	Vista CA
System Size	172.8 kW
Number of Panels	480
Annual Energy Cost Savings	\$45,000

"As a full-time senior living and memory care service provider, Vista Gardens is a constant consumer of energy. With a wide-array of offerings for their community members including various therapies, around-the-clock security, and 5-acres of amenities, their average electric bills averaged out at over \$4700 per month. Vista Gardens searched for a lowcost renewable energy solution with great financi"

The Baker Solution

Vista Gardens and a third-party consultant with Next Grid Partners, LLC had a solar capacity in mind when Baker began planning the project. At one point during the system planning phase, the project budget changed slightly. The Baker team quickly adapted to its clients needs and worked with all parties to reduce the system size after contract to satisfy the new budget requirement. In the end, the project consisted of a quantity of 480 360-watt rooftop panels with SolarEdge inverters, delivering 172.8 kilowatts (kW) of clean, photovoltaic energy. Baker was able to provide a 5 year production guarantee for the whole solar installation - an industry rarity.

The Result

Vista Gardens is already seeing results of their solar investment, with significantly lower electricity bills for their facilities. They are projected to save over \$45,000 annually in electrical costs. In addition to the savings, working with Baker was the perfect fit for their facility. Despite being in operation 24/7 during all phases of construction, Vista Gardens received 0 complaints from their community members, staff members and neighbors.
