## HANGER 736 LIGHTING IMPROVEMENTS

This lighting improvement was for a large hanger complex at San Bernardino International Airport. The project required coordination with the tenant, as Baker worked around planned aircraft maintenance schedules and at elevated heights (75+ feet). The project also included the demolition and removal of existing High Bay fixtures as well as the installation of new High Bay fixtures, new conduit and wiring, and new lighting control panels.

## Project Specs

Location : San Bernardino
