

## THE JACOBS & CUSHMAN SAN DIEGO FOOD BANK

### The Challenge:

The Food Bank was faced with two challenges:

The Food Bank's significant energy costs have a direct correlation to the number of meals the Food Bank can provide to those in need; reducing energy costs means more meals for individuals and families across San Diego County.

1. Offset the high electrical cost of operating an 80,000 square foot warehouse facility along with the additional costs associated with running huge freezer rooms and a new industrial-sized composter.

## Project Specs

Location :

San Diego, California
