

TWO BUNCH PALMS ELEMENTARY SCHOOL

Baker Electric provided electrical design and installation under General Contractor Reno Contracting, Inc. to deliver the 317.4 kW ground mount PV system to Two Bunch Palms Elementary School. The solar energy facility includes 920 SunPower solar panels, 12 inverters, and a DRAKER PV monitoring communication system. The electrical system is one of two installed within the Palm Springs Unified School District.
The installation not only benefits the school directly but also provides the district with increased energy efficiency and significant financial savings.
