

## ESCONDIDO CHARTER HIGH SCHOOL

### The Challenge:

Escondido Charter High School was faced with a challenge:

- *Save on electrical costs in order to put more funds back into the classroom.*

ECHS's Founder and President, Dennis "Coach" Snyder, had the foresight eight years ago to install solar on the school's gymnasium roof to save on energy costs. With continued growth, the initial small PV system could not keep up with energy demands. This led the school to look into expanding the size of their system in order to keep electrical costs low so they can invest their funds in the classroom where they belong.

## Project Specs

Location :

Escondido, California

**Baker Electric Headquarters**  
1298 Pacific Oaks Pl  
Escondido, CA 92029

**Baker Electric Los Angeles**  
6300 Katella Ave  
Cypress, CA 90630

877.678.8080, 760.646.6000

**Baker Electric Corona**  
1385 Old Temescal Road  
Suite 250  
Corona, CA 92881

Main:  
760.745.2001

Commercial Solar:  
760.690.5010

Baker Electric Los Angeles
