

GATEWAY CHULA VISTA CENTER

Baker Electric completed the first phase of installation for this 345 kW solar system on the rooftop of the Gateway Chula Vista center (Mountain West project). Phase 2 includes PV installation on top of their parking structure and is scheduled to be completed in March of 2015. The Gateway Center is the first large commercial project to use the Property Assessed Clean Energy (PACE) financing program to install solar. The system is made up of 1,054 solar panels and will power approximately 90% of its electricity!
