

BAKER ELECTRIC CORPORATE HEADQUARTERS

Baker Electric continues to grow with the PV industry, and our demonstration of commitment to green solutions grows with us. Our 85 kW rooftop installation was constructed at our Escondido Corporate Headquarters in 2009. Baker is currently involved in projects that range from 3 kW to multi-megawatt in size. Relying on our history and experience, Baker will lead the PV industry and is quickly becoming a best-in-class regional PV integrator.
