## FATHER JOE'S VILLAGE PLACE

The San Diego-based Father Joe's Villages® Village Place is now the home of a solar installation. The project is a 53.4 kW high efficiency SunPower solar panel system with annual production estimated at over 70,000 kW hours. The installation consists of 168 roof-mounted SunPower solar panels with six SMA Sunny Boy inverters. The 22,000 SF Village Place multifamily complex provides 49 units of permanent housing for low-income and formerly homeless members of the community, along with administrative and shared community space.

In addition to the financial benefit of lower electric bills, the residents of Village Place were part of an educational outreach program, focusing on the benefits of renewable energy and the potential opportunities in the renewable energy market.

The funding for this solar project was provided through a competitive grant from the California Solar Initiative (CSI) which
