Project Specs

Location : Vista CA

System Size 172.8 kW

Number of Panels 480

Annual Energy Cost Savings $45,000

The Baker Solution

Vista Gardens and a third-party consultant with Next Grid Partners, LLC had a solar capacity in mind when Baker began planning the project. At one point during the system planning phase, the project budget changed slightly. The Baker team quickly adapted to its clients needs and worked with all parties to reduce the system size after contract to satisfy the new budget requirement. In the end, the project consisted of a quantity of 480 360-watt rooftop panels with SolarEdge inverters, delivering 172.8 kilowatts (kWs) of clean, photovoltaic energy. Baker was able to provide a 5 year production guarantee for the whole solar installation - an industry rarity.

The Result

Vista Gardens is already seeing results of their solar investment, with significantly lower electricity bills for their facilitiies. They are pojected to save over $45,000 annually in electrical costs. In addition to the savings, working with Baker was the perfect fit for their facility. Despite being in operation 24/7 suring all phases of construction, Vista Gardens received 0 complaints from their community members, staff members and neighbors.
