

SIEMPRE VIVA RD

The project is located on the SR905 in Otay Mesa from Enrico Fermi Rd to Siempre Viva Rd. This project consists of new lights on a newly constructed bridge for Siempre Viva Rd near the Mexico border. It also consists of new decorative lighting panels on the outside of the bridge depicting an eagle head that is illuminated with uplights at night. The uplights are illuminated in red, white and green when entering Mexico and red, white and blue when entering the United States. The bridge lights have post top LED fixtures that illuminate the bridge.

New signals with video detection systems and lighting systems were installed at the Siempre Viva Rd on and off ramps to the bridge. The project also includes new fiber optic cable systems, modified traffic monitoring stations, modified ramp metering systems, and modified flashing beacon systems.
