CSUSB EXTERIOR LIGHTING RETROFIT

Baker Electric led the design, development, installation, and performance management of a large-scale exterior lighting retrofit across approximately 384,000 square feet at California State University San Bernardino and its Palm Desert Campus.

The project replaced outdated lighting systems in parking lots, two parking structures, campus roadways, and walkways with energy-efficient LED fixtures equipped with integrated adaptive wireless controls. This comprehensive upgrade significantly enhanced campus safety, visibility, and sustainability, while delivering substantial long-term energy savings and reducing operational costs for the university.

Project Specs

Location : San Bernadino, California

Owner : Cal State University San Bernadino

General Contractor : Baker Electric

Delivery Method : Design-Build

Project Value : $22 Million
